Description**

A vehicle parked at Clay Street on the North side of the street near the Redwood Park entrance had a red metal can with quarter-sized holes in the side and a lid and wheels drew the attention of the Security Manager, Jeff Ellis. Ellis thought the item appeared to be similar to a cyanide dispersal device he has seen warnings of called a "mubtakar." There was no apparent substance coming from the device or the car, no smell and no symptoms reported.

Gold Mitsubishi in foreground is subject vehicle.

Can sitting in back seat with some plastic wrapped on the front.

Vehicle was very dirty and beat up.

Vehicle had current CA plates. 4FLG503

Notes	<p>Ellis noticed the device and managed the response. The device did not appear to be active and Ellis consulted four different people of different nationalities and long experience onsite. None had seen anything like the device. Ellis notified the Director of Security who was sitting with colleagues. All suggested Ellis contact the SFPD. Ellis left a message for SFPD HSU, called SFPD Central TLO Tobin who advised Ellis call SFPD dispatch. Ellis called SFPD dispatch and a team of SFPD Officers arrived very quickly. Officers Peete and Chow examined the item and stated that it was not a danger. Officer Peete is a TLO. (Terrorism Liaison Officer.)</p> <p>Ellis had a rover take photos of the device and vehicle and made a report which will be sent to the authorities.</p>
